

Olawale Emmanuel Olaniran

Nationality: Nigerian **Place of Birth:** Nigeria **Gender:** Male
Phone: +234 07056220001
Email: olawale.emmanuel15@gmail.com
Address: Oshodi, Lagos, Nigeria

ABOUT ME

I am an Electrical and Electronics Engineering graduate (HND, Upper Credit) with hands-on experience in instrumentation systems and growing expertise in cloud infrastructure and networked systems. Skilled in load cell integration, system calibration, Linux server configuration, and AWS-based scalable deployments. Demonstrates practical experience in both hardware systems and cloud-based architectures. Seeking MSc in Computer Engineering or Electrical and Computer Engineering.

EDUCATION AND TRAINING

Higher National Diploma (HND) — The Polytechnic Ibadan (2019–2021)
Field of Study: Electrical & Electronics Engineering

National Diploma (ND) — The Polytechnic Ibadan (2015–2017)
Field of Study: Electrical & Electronics Engineering

RESEARCH & TECHNICAL EXPERIENCE

Design and Implementation of Bluetooth-Based Home Automation System (2021)

- Designed and implemented a wireless control system for electrical appliances using Bluetooth communication
- Developed system architecture integrating microcontroller, relay modules, and control interface
- Conducted iterative testing and debugging to resolve connection instability and control delays
- Evaluated system performance under real usage conditions and improved reliability
- Demonstrated application of embedded systems in automation and control environments

Electrical Systems Design and Installation (ND Project) (2017)

- Designed electrical wiring system for a functional workshop environment
- Installed distribution systems and electrical appliances
- Identified faults during installation and implemented corrective solutions
- Applied safety and operational standards in electrical system setup

PROJECTS

Highly Available Web Infrastructure Deployment (AWS)

- Deployed dynamic website using Amazon EC2
- Configured Application Load Balancer for traffic distribution
- Implemented Auto Scaling Group for scalability
- Integrated CloudFront CDN for global accessibility
- Configured Route 53 for domain name management
- Secured application using SSL certificate (HTTPS)

- Installed and managed Apache (httpd) web server on Linux

LAMP Stack Web Application Deployment

- Developed and deployed dynamic website using Linux, Apache, MySQL, and PHP
- Configured backend database and server-side application
- Hosted application on EC2 cloud infrastructure

Static Website Hosting (AWS S3)

- Hosted static website using Amazon S3
- Configured public access permissions
- Integrated CloudFront CDN for optimized delivery
- Connected custom domain via Route 53
- Implemented HTTPS security using SSL certificate

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, CloudFront, Route 53, Auto Scaling)

Operating Systems: Linux (server setup, file management, bash usage)

Networking: IP configuration, routing fundamentals

Tools: Wireshark, Splunk

Programming: Bash (Basic), Python (Basic – Learning)

Web Server: Apache (httpd)

Engineering Skills: Instrumentation, Load Cell Integration, Calibration, Multimeter Diagnostics, Soldering

WORK EXPERIENCE

Single Stone Nigeria Limited – Industrial Trainee, Instrumentation & Metrology (2017–2018)

- Installed and calibrated industrial weighing systems including weighbridges and precision scales
- Integrated load cells with electronic indicator systems for accurate measurement output
- Performed full system installation of weighing scales (excluding heavy weighbridges)
- Diagnosed and repaired faulty electronic indicator panels and transformers
- Conducted multimeter testing to verify signal integrity across load cell connections
- Applied soldering techniques for repair and maintenance of circuit components
- Assisted in structural setup and installation of measurement platforms

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) — 2025

Mode of Learning: Online

Cyber Security & Networking — NIIT Lagos, 2023

Mode of Learning: Presential
